

International Platform for Dryland Research and Education

Research Project Workshop

IPDRE, Tottori University is a platform of research and education for various issues occurring in drylands and developing countries.

The researchers of IPDRE are working on their projects in collaboration with overseas partner institutes to tackle various problems facing drylands such as aeolian dust, land degradation, food security and water scarcity.

This workshop will cover the latest situations of global issues especially affecting the people of drylands as well as the progress status of our research on these issues.

Fri, 7 Jan 2022 1:30-5:10 PM

Online (Zoom)

Venue (online)

< 1 > 1:30 – 2:20 PM Opening, Project overviews
