

SPECIAL SEMINAR of IPDRE

Dr. Mesut Keser

International Winter Wheat Improvement Program (IWWIP),
ICARDA-Turkey Office

Developing High Yielding Winter Wheat Varieties for CWANA Region by Using Diverse Germplasm

Date: March 25 (Fri), 2016 10:30-12:00

Place: Lounge, International Arid Lab in ALRC

IWWIP is jointly supported by Turkey, CIMMYT and ICARDA. Dr. Mesut Keser is the coordinator from ICARDA side and is taking the leadership of winter wheat breeding in CWANA region. You can learn the reality of wheat breeding for food security in the arid regions.
